## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6, 7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Takeda et al (6935141).

Takeda et al (6935141) teaches the invention as claimed including sock (10) knitted integrally by a sock knitting machine, the sock comprising: a cylindrically knitted portion (12) which forms a sole portion and an instep portion; and a toe housing portion (14) provided continuously with the cylindrically knitted portion, wherein said toe housing portion includes an invertedly knitted front portion having a substantially planar trapezoidal shape, an invertedly knitted back portion having a substantially planar trapezoidal shape, and a knitted portion which is provided as a forwardly knitted portion between said invertedly knitted front portion and said invertedly knitted back portion along contours of these front and back portions as seen in figure 1B.

### ***Allowable Subject Matter***

Claims 8, 10 and 11 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
